

PLATE PROCESSING

GEKA's PAXY product line offers CNC solutions for automated punching of steel plates.

The PAXY line automates tedious and time-consuming preliminary tasks, such as center marking and manual positioning. These solutions maximize productivity, reduce costs and increase accuracy.

FEATURES

	PAXY
Material feeding	automático
Positioning	automático
Nº of Axis	2
The minimum area	1000x500 mm

Capacities based on material resistance at 45 kg/mm²
