SE25 SE65

SE2T

Portable OD clamping facing machines

The SE25, SE65 and SE2T are the essential complements of all your welding machines. They allow a perfect preparation of the tubes for manual or mechanised welding operations.

The SE25, SE65 and SE2T clamp on the OD diameter of the tube with clamping collets.

No distortion of the tubes, even the thinnest ones.

Electrically powered or with cordless electric drive.

VERY LIGHT WEIGHT
PORTABLE AND VERSATILE
For thin tubes, fittings,
micro fittings and elbows

The PREMIUM solution for applications within various fields such as:

- ✓ High Purity
 - Semi-conductor industry
 - Pharmaceutical industry
 - Clean rooms
 - Food and beverage

- ✓ Aerospace industry
- ✓ Shipbuilding
- ✓ Nuclear
- ✓ Oil and gas
- ✓ Defense

SL SERIE

OD CLAMPING FACING AND BEVELLING MACHINES

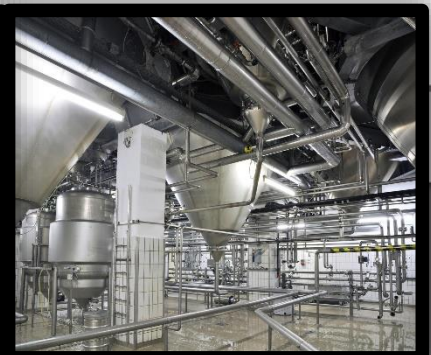

The SL-series has been especially designed to square tubes, fittings and tees on most metal pipes and tubes including stainless steel using the short clamping head from 10 mm to 120 mm OD.

The clearances, capacities and designs have been engineered along with the end-users industries. Those machines are ideal for **high purity applications**, such as semi-conductor industry, pharmaceutical industry, clean rooms, food and beverage.

They minimize the risk of contamination since they produce collectible ribbon-like chips and no particulates

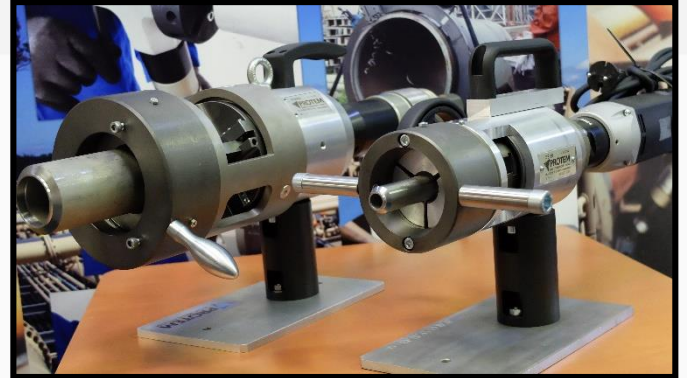

Their small dimensions allow them to be **portable or bench mounted**.

SE SERIE

OD CLAMPING HEAVY DUTY FACING AND BEVELLING MACHINES

SE-series end prep tools are lightweight and portable. They will perform repeatable quality weld preps on most metal pipes and tubes including stainless steel, from 10 mm to 120 mm OD.

They clamp into the pipe by means of a heavy duty collet and thus provide a chatterfree accurate finish.

The cutting head will bevel, face and counterbore individually or in a simultaneous operation. The tool-holder plate can hold up to 4 tool blocks.

The machines of the SE-series are available with either pneumatic or electric drive.
